

Jemalong Weir Pool

Refilling of Jemalong Weir Pool to commence

14 September 2020

Tributary inflows downstream of Wyangala dam since late July, have totalled in excess of 220GL. During this period the main gates were out of water allowing the high flows to pass unrestricted.

Now that the tributary flow rates are reducing, we are planning to **increase the Jemalong weir pool level slowly over the coming two weeks in preparation for the irrigation season.**

WaterNSW advises landholders and users within the influence of the Jemalong Weir pool to be aware of changing river levels during the coming two weeks and plan their activities accordingly.
