# How much water do I need for my domestic supply? 

## WaterNSW

The annual water needs for a property will vary depending on where it is located, the number of people dependent on the supply, and the size of the domestic garden.

The following table can help you estimate the volume of water required for your annual, domestic water needs for use on your property.

## Estimates of annual water needs

| Domestic water | Description | (1) <br> $\mathrm{m}^{3} /$ person/yr or area | (2) <br> Persons/area | $(1) \times(2)$ <br> Sub total $\mathrm{m}^{3}$ |
| :---: | :---: | :---: | :---: | :---: |
| Household | House - without septic | 51 |  |  |
|  | House - with septic | 64 |  |  |
|  | Septic only | 13 |  |  |
| Domestic water | Description | (1) <br> $\mathrm{m}^{3}$ /unit | (2) \# of units | $\text { (1) } \times(2)$ <br> Sub total $\mathrm{m}^{3}$ |
| House garden <br> For each $1000 \mathrm{~m}^{2}$ or 0.1 ha | - coastal/tablelands | 200 |  |  |
|  | - slopes | 400 |  |  |
|  | - plains | 600 |  |  |
|  | - western | 800 |  |  |
|  |  |  |  |  |

## Total net annual water

Note: This table provides an estimate of your net annual water requirement and is not recommended for designing reticulation schemes which are based on peak daily requirements.

To convert net annual water requirement into megalitres use the following equation:
$m^{3} \div 1,000=$ $\qquad$ Megalitres (ML)

1 megalitre
is a million litres
or 1,000 kilolitres of water
