

Operations Update

Lower Namoi Downstream Tributary Inflows

30 July 2020

Recent rainfall in the Namoi catchment has resulted in tributary inflows from the Peel River into the Namoi River.

Customers wishing to extract high security, stock and domestic or general security account water are requested to place water orders immediately.

Customers wishing to extract account water must place a complying water order using one of the following options:

- Go to waternsw.com.au and log into your iWAS account.
- Email: customer.helpdesk@waternsw.com.au.

Please note Water order forms are available on our website – [click here](#).

Landholders are also advised that a replenishment flow for the unregulated Pian Creek will be carried out with the current flows and landholders are advised to ensure stock and domestic supplies are satisfied with this current flow.

Any announcements regarding Supplementary Access will be communicated in separate notices.

Indicative dates for flow arrival at various locations are shown in the table below.

WaterNSW will continue to monitor water resources and weather conditions and adjust planned delivery patterns in response to changes as required.

WaterNSW thanks customers for working together and with WaterNSW during these dry periods to maximise water availability for the Valley as a whole.
