## A Drop Around the World

## Book Review Activities

## Name:

## Crossword Puzzle

Use your understanding of water to answer the clues and solve the puzzle. (Hint: The words are in the word bank on the next page.)

## Across

3. Big bodies of water that cover most of Earth
4. A very wet area of land
5. A cloud that is close to the ground
6. When water vapour cools and turns into liquid water
7. Water as a gas
8. The force that helps raindrops fall
9. The state of our atmosphere (wind, temperature, wetness)
10. When raindrops warm and turn into water vapour
11. When snow warms and turns into liquid water
12. A very dry area of land

## Down

1. Living things that take in water through their roots
2. Cold places at the top and bottom of Earth
3. When liquid water falls from the sky
4. An unwanted thing in our water
5. It appears when water vapour bends sunlight after it rains
6. It forms when lots of water drops condense in the sky
7. A large stream of water that flows in a channel
8. An area where water is collected by the natural landscape
9. Water that leaves our bodies through our skin
10. A tiny ice sculpture that falls from the sky as precipitation

They might be forwards, backwards or even diagonal!

## Did you know?

Even though water covers $71 \%$ of the Earth's surface, only $3 \%$ of the water on Earth is fresh water and only $0.5 \%$ of the water on Earth is available fresh water.

Imagine if the world's water supply were only 100 litres. Our usable supply of fresh water would only be about 0.003 litres- which is about $1 / 2$ of a teaspoon!
