

# Barwon Darling Management Zones Flow Class Map

---

13 March 2018

## WaterNSW Disclaimer

1. The Barwon Darling Management Zones Flow Class Map only applies to the WSP Flow Classes and Daily Access Rules as outlined in clause 45 of the above WSP. These are the WSP access rules that allow pumping and the cease-to-pump conditions that prohibit pumping. Individual water access licence requirements as imposed by licence conditions prevail in circumstances where an individual water access licence specifies Flow Classes and Daily Access Rules different to those in clause 45 or Table A of the WSP. Therefore, the Barwon Darling Management Zones Flow Class Map does not apply to, and should not be used in respect of, individual water access licence rules and/or Flow Classes that are not governed by the Daily Access Rules in clause 45 or Table 5 of the WSP.
2. The Barwon Darling Management Zones Flow Class Map cannot be relied on by holders of access licences in circumstances where a specific Management Zone in the Barwon Darling Management Zones Flow Class Map is not visible, which indicates that the flow data for that Management Zone is older than 24 hours.
3. The Flow Class colours may change without notice as they reflect the flow conditions used to produce them, which may also change without notice. The reading is in “ML/day”, which is a unit of instantaneous flow measurement and is not reflective of total volume per day. The “ML/day” unit is relevant to the measurement of flow rates specified in Column 5 of Table A of clause 45 in the WSP.
4. WaterNSW calibrates the flow measuring equipment that the Barwon Darling Management Zones Flow Class Map reflects. However, holders of access licences should contact WaterNSW on 1300 062 077 if there is reason to suspect an error, or in circumstances where the relevant Management Zone in the Barwon Darling Management Zones Flow Class Map is not visible.
