

Fluctuation in Release from Burrendong

21 October 2020

WaterNSW would like to advise customers d/s of Burrendong dam that the releases from the dam will fluctuate in order to facilitate removal of the cold water pollution curtain for a full inspection and engineering assessment.

No releases will be made from 9am to 3pm and release will be increased to up to 3000ML/d for rest of the 24hrs period. This activity is scheduled to be completed before end of next week. The outage and the subsequent dam releases are scheduled to enable minimal disruptions.

Information on Cold water pollution trial can be viewed at:
