

Amend approval to reduce pump size

This application form is for the amendment of an existing work approval to reduce pump size.

Who can apply?

An approval holder can apply for the amendment of their existing work approval to correct the size of a pump. Please note, this form can only be used to **reduce** the pump size, not increase the size.

You can request to reduce the size of **multiple pumps** within **the same** work approval under this one application form.

However, if the pumps are under different work approvals then **each work approval** will need a **separate** application form.

Why is this form needed?

Mandatory Metering requirements introduced in the NSW non-urban water metering framework provide metering thresholds. Therefore, if your pump meets the threshold, you will have to meet the **mandatory conditions**.
