

Operations Update

22 November 2018 - Lower Namoi flow plans

As customers are aware with continuing drought conditions, Lower Namoi water deliveries have been severely constrained.

The delivery of an environmental flow using water owned by the Commonwealth Environmental Water Holder is currently underway, providing flows to the Namoi River below Gunidgera Weir.

The table below outlines the approximate flow arrival dates.

Gauging Station	Forecast flow arrival
D/S Gunidgera	Commenced 9 November
D/S Weeta	Commenced 12 November
Bullawa	Commenced 16 November
Bugilbone	Commenced 22 November
Goangra	Approximately 6 December
Walgett	Flow arriving at Walgett can-not be guaranteed however if it does, it is not likely to arrive until the last week of December 2018.

Customers wishing to take stock and domestic water in conjunction with the environmental delivery are encouraged to place water orders.

We will continue to monitor water resources and weather conditions and adjust planned delivery patterns in response to changes in conditions as required.

We recognise the hardship that these measures place on customers and we thank you for your understanding and cooperation.
