

# Explore the world of water bugs

Waterways are home to many creatures, including water bugs. The types of water bugs and the number of them living in the water can help us understand how healthy the water is.

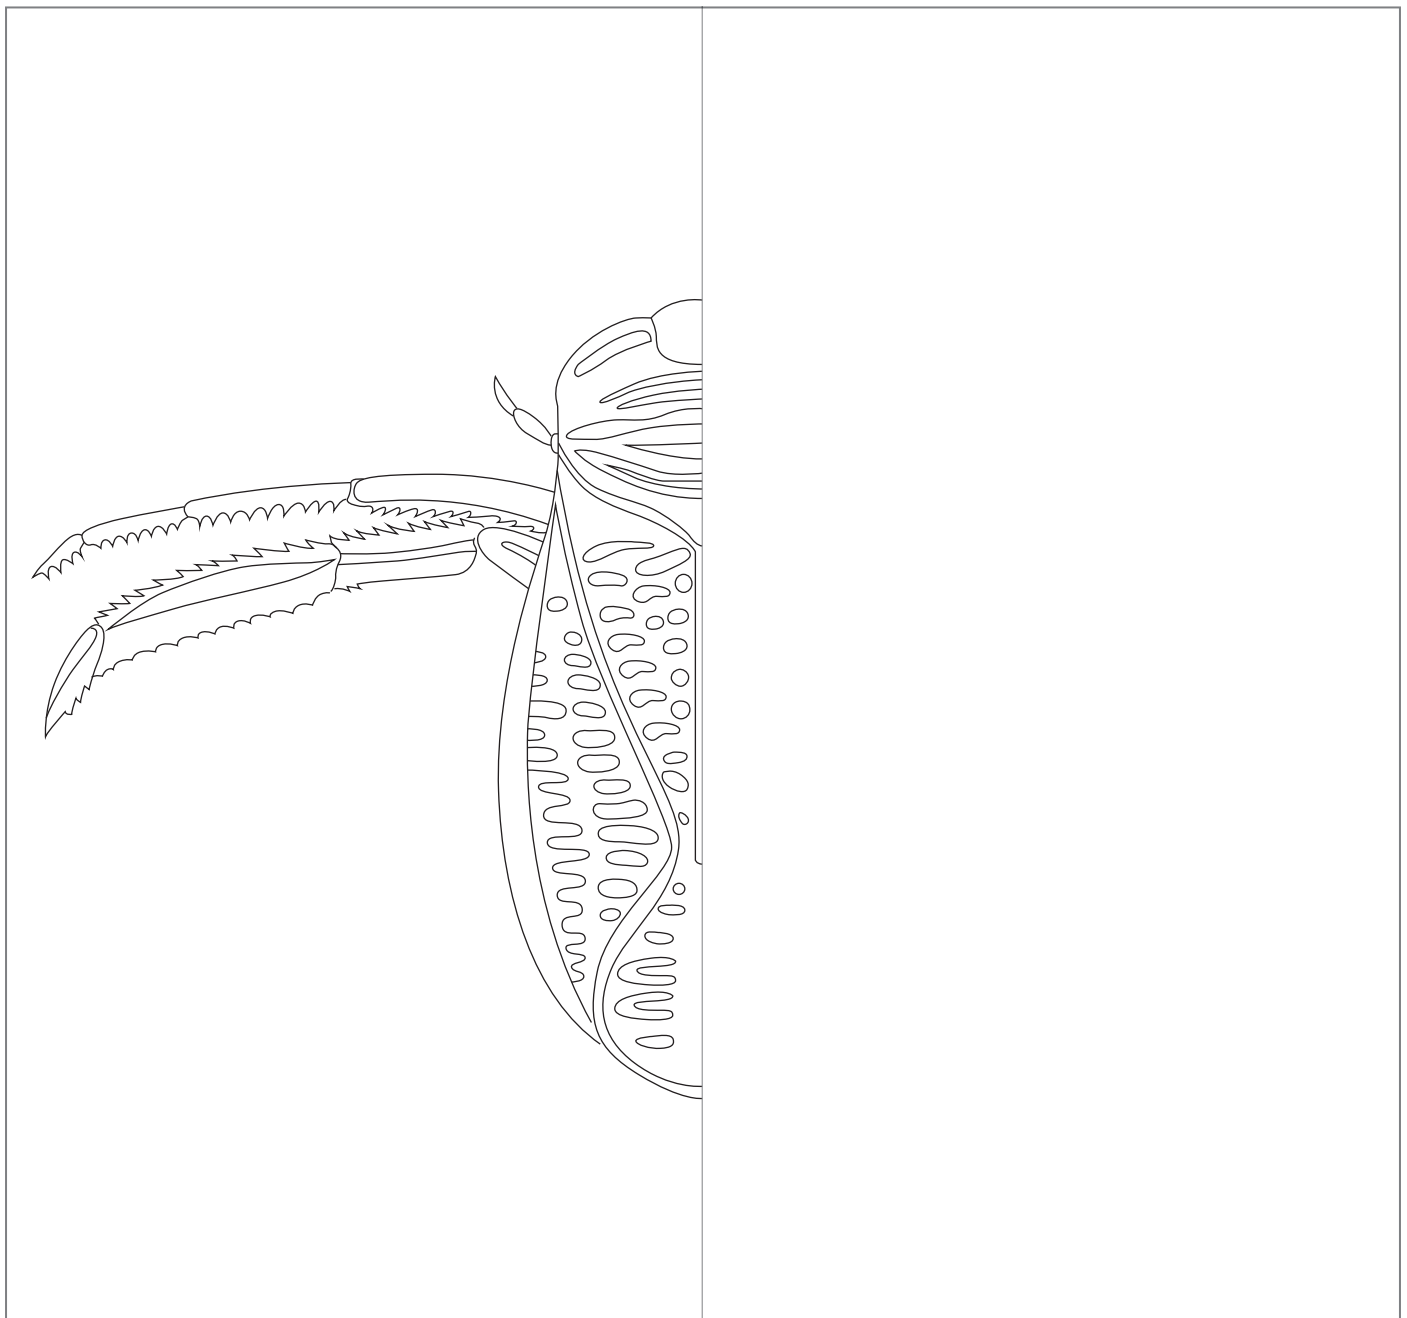

## Water Boatman

Use the line of symmetry to help you draw the mirror image of your bug.

 Water Boatmen live among plants on the water surface or in slow moving freshwater.

 They eat small bugs, tadpoles and little fish.

 Water Boatmen swim upside down.

How sensitive is your bug to pollution in the water?

Very tolerant		Tolerant			Sensitive		Very sensitive		
1	2	3	4	5	6	7	8	9	10
