

Explore the world of water bugs

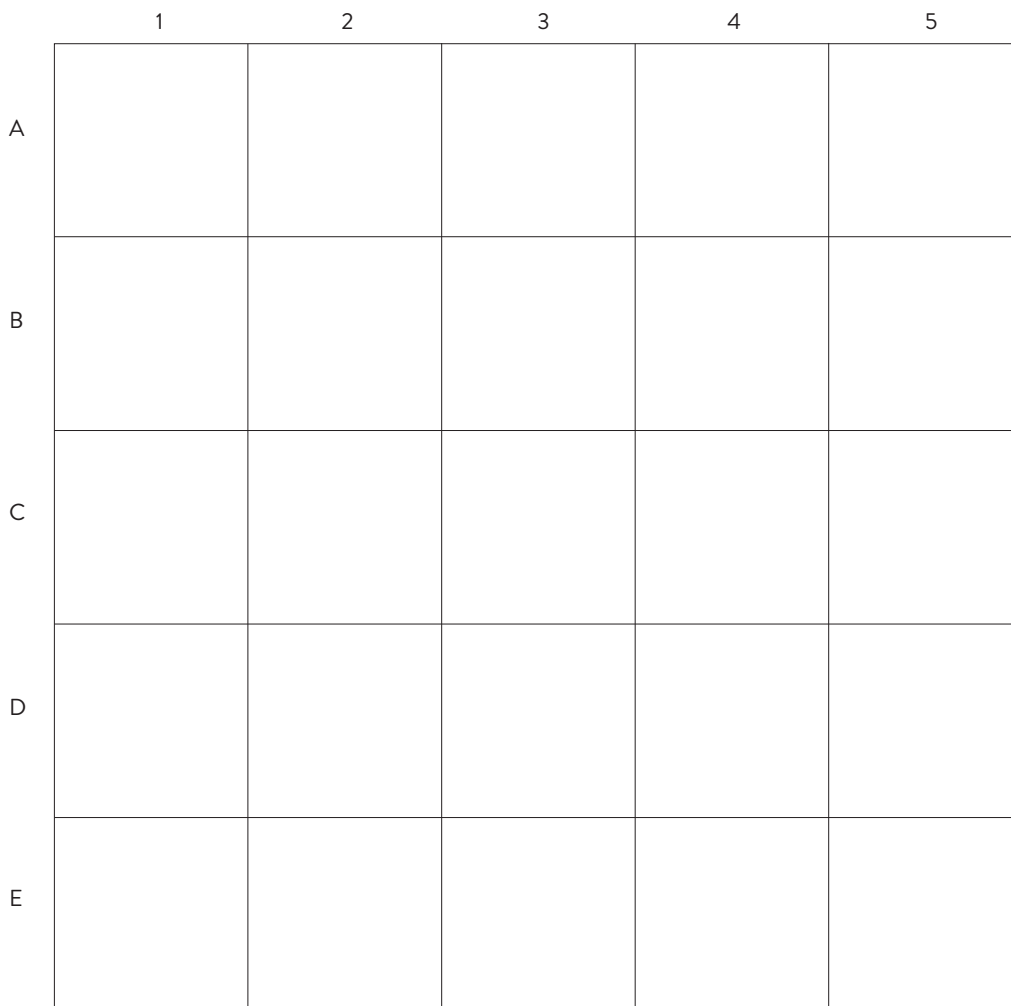

Waterways are home to many creatures, including water bugs. The types of water bugs and the number of them living in the water can help us understand how healthy the water is.

Water Strider

Use the grid lines to enlarge your water bug. You might find it easier to copy it one square at a time.

-  Water Striders are found on the surface of slow-moving freshwater streams.
-  They eat mosquito babies and bugs.
-  Water Striders walk on water.

How sensitive is your bug to pollution in the water?
